

# Activity Kit

## Dinosaurs Kit

### Materials

#### Dinosaur Museum in a Box (10 specimens)

1. Allosaurus tooth
2. Edmontosaurus tooth
3. Camarasaurus tooth
4. Tyrannosaurus rex tooth
5. Saltosaurus eggshell fragment
6. Footprint
7. Lambeosaurus skin imprint
8. Eoraptor skull
9. Massospondylus skull
10. Troodon brain cast

#### Supplemental Books, DVD's

*DK POCKETS: DINOSAURS*  
*Mysteries of the Fossil Dig*  
*Dinosaurs for Every Kid*  
*DINOSAURS Alive! DVD*

Recommended for grades 3 and up

## What to know about this kit...

This kit contains plaster reproductions of a variety of dinosaur fossils. There are no real fossils in this kit. They are breakable.

You can examine the sharp, pointed teeth of the meat eating dinosaurs *Allosaurus* and *Tyrannosaurus rex*. The flat tooth battery of the *Edmontosaurus* was used to chew plants. *Camarasaurus* used its spoon-shaped teeth to strip leaves off of tall plants.

There are two life-size skull impressions from small dinosaurs, *Eoraptor* and *Massospondylus*. There is also an impression of the inside of a *Troodon* skull, allowing you to see the size of the brain.

The kit also contains examples of trace fossils. Trace fossils are fossils other than teeth and bones. These include an eggshell fragment, footprint, and skin impression.

Recommended for grades 3 and up
