Virtual Genealogy: Starting Out With DNA – Using DNA to Expand Your Family Tree

Tuesday, March 24 6:30-8:00 pm

Virtual Event | Adult

Learn the three main types of DNA tests and what each can tell you about your ancestors, as well as the most popular testing companies and their unique tools and databases. Then discover how to put your results to work with the basics of interpreting match lists, understanding shared DNA amounts, and using clustering tools to connect with relatives and identify common ancestors. Case studies will show how DNA testing has confirmed lineages, broken through brick walls, and revealed new stories.
